## ABOUT CADABAM'S

Cadabam's Group was established in 1992 by Mr. Cadabam M. Ramesh. This endeavour was inspired by the life of his sister, the late Amitha M. Cadabam, who suffered from an intellectual impairment and passed away at a young age of 24. Moved by this deeply personal experience, the organisation was envisioned as a companion in the mental health journey towards recovery.

In its early years, Cadabam's focused on providing short-term rehabilitation with supportive employment opportunities and long-stay homes for older adults with intellectual impairments. Since then, it has evolved to be the country's largest psychosocial rehabilitation centre—and continues to grow.

Today, as part of its commitment to reshaping the future of mental healthcare, Cadabam's is now expanding its reach by partnering with leading institutions to educate and train the next generation of mental health professionals.

# | HIGHLIGHTS

32+ years of experience

India's largest psychosocial rehabilitation centre

Pioneers in comprehensive treatment care

State-of-the-art rehabilitation care, outpatient consultation, emergency hospitalisation and therapy services

200+ mental health professionals working across 5 psychiatric hospitals in Bangalore, Mysore and Hyderabad and 5 Mindtalk centres

Dedicated team of professionals with 20 consultant psychiatrists, 36 clinical psychologists, 400+ support staff and 70 counsellors

1500+ individuals recovering and returning to society each year.

100+ training sessions conducted across India through the preventive and promotive wing each year.

# BSc

# CLINICAL PSYCHOLOGY

The BSc Clinical Psychology programme at S-VYASA (Deemed-to-be University), in collaboration with Cadabam's Hospitals, offers comprehensive education and hands-on clinical training.

Students study foundational psychology, Counselling theories and evidence-based interventions, with specialised courses in CBT, Family Therapy and more. Clinical training includes practical experience in assessments, diagnoses and treatment planning under licensed professionals. The programme's robust assessment system evaluates academic progress and clinical competencies through exams, practical assessments and case presentations. The integration of theoretical learning and clinical practice prepares students to apply psychological theories effectively. Graduates are well-equipped for careers in clinical psychology and allied healthcare. Sciences..

## ELIGIBILITY

**Graduated Higher Secondary/ Intermediate  
(10+2)/ equivalent in any stream**

# PROGRAMME HIGHLIGHTS

The Clinical Psychology programme at S-VYASA (Deemed-to-be University) in association with Cadabam's Hospitals, prepares students for a fulfilling and impactful career in the field of mental healthcare.

## Clinical Training at Cadabam's Hospitals

Gain hands-on experience and work with diverse patient populations under experienced clinicians.

## Exposure to Specialised Therapeutic Modalities

Learn a variety of therapeutic techniques, including CBT, Family Therapy, Group Therapy, Biofeedback, Mindfulness and Psychotherapy to address mental health issues effectively.

## Integration of Theory and Practice

Apply theoretical knowledge in real-world clinical settings, enhancing understanding and practical skills in psychological concepts and therapeutic contexts.

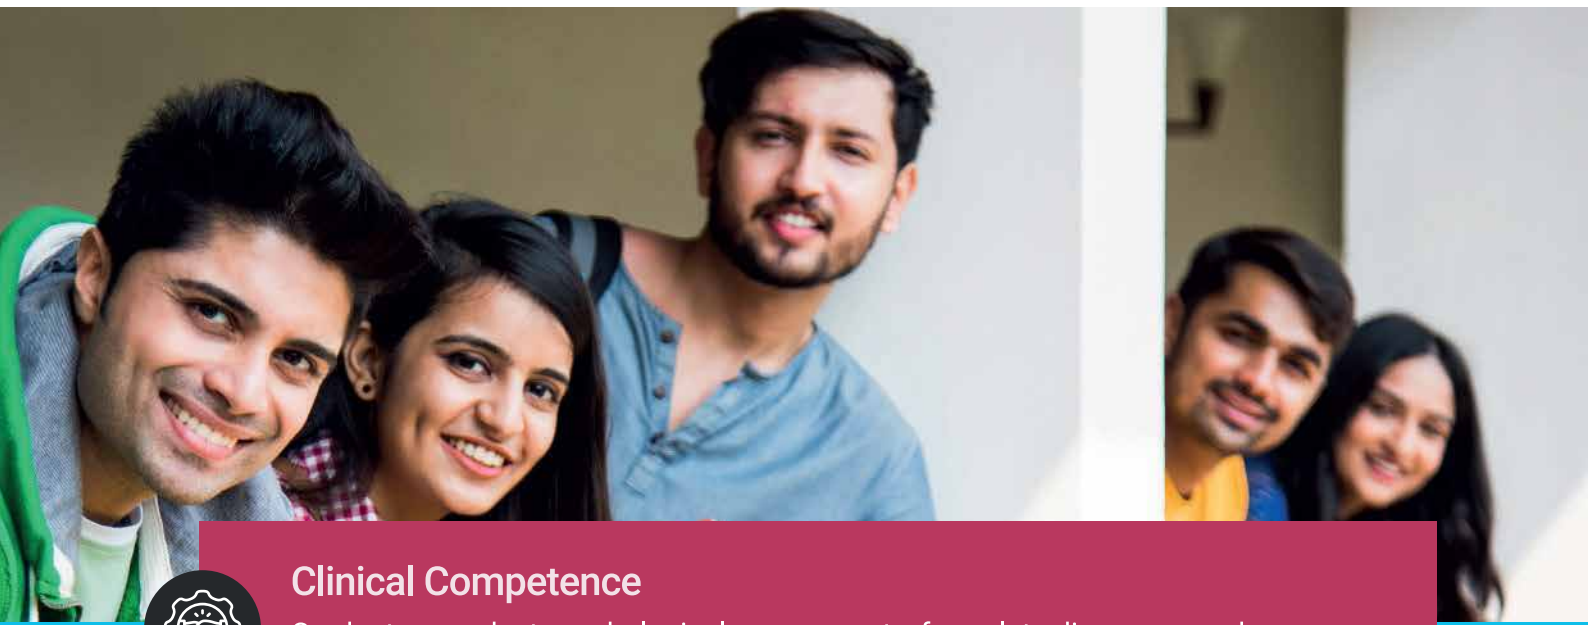

## Multidisciplinary Approach

Experience a comprehensive perspective on mental health by integrating disciplines such as psychiatry, neurology, counselling and rehabilitation.

## Professional Development and Career Preparation

Develop essential professional skills and receive thorough training in communication, ethics and cultural competence. This ensures readiness for successful careers in clinical psychology.

# | PROGRAMME OUTCOMES

## Clinical Competence

Graduates conduct psychological assessments, formulate diagnoses and implement evidence-based interventions across diverse mental health issues.

## Professional Ethics

Graduates adhere to ethical guidelines, demonstrating integrity, respect, confidentiality and cultural competence in their professional conduct.

## Critical Thinking and Problem-Solving

Graduates exhibit critical thinking and problem-solving skills, evaluating research, assessing client needs and developing effective treatment plans.

## Effective Communication

Graduates communicate effectively with clients, families, caregivers and interdisciplinary teams. Effective communication demonstrates empathy, active listening and clear articulation of psychological concepts.

## Collaborative Practice

Graduates collaborate with other healthcare professionals to provide comprehensive care, emphasising interdisciplinary teamwork to enhance mental health services.

# CAREER OPPORTUNITIES AND PLACEMENTS

Clinical Psychologist	Counselor/Therapist	Psychological Assessor	Mental Health Advocate
Research Assistant	Case Manager	Rehabilitation Specialist	Academic Advisor
EAP Counselor (Employee Assistance Programme)	Substance Abuse Counselor	Programme Coordinator	Psychoeducation Specialist
Telehealth Therapist	Child and Adolescent	Trauma-Informed Therapist	Geriatric Counselor

# MSc CLINICAL PSYCHOLOGY

The MSc Clinical Psychology programme at S-VYASA (Deemed-to-be University), offers academic excellence and comprehensive training in clinical psychology theory, research and practice, covering psychopathology, psychological assessment, psychotherapy techniques, research methods and clinical ethics. A key feature is the practical experience through clinical training at Cadabam's Hospitals, a leading mental health facility in Bangalore, where students apply theoretical knowledge in real-world settings under experienced clinicians, working with diverse patient populations. The programme is taught by expert faculties who provide valuable insights and guidance. Students engage in research projects and scholarly activities, developing critical thinking and research skills. Overall the programme prepares students for successful careers in mental healthcare by providing a strong foundation in both theory and practice.

## ELIGIBILITY

**BA/ B.Sc from a recognised university with a minimum aggregate marks of **50%** (45% in case of SC/ ST/ OBC)**

**Candidates must have studied Psychology as a compulsory subject or any Allied Health Sciences, Nursing, Physiotherapy, Pharmacy, Life Science, and medical degree**

# PROGRAMME HIGHLIGHTS

The MSc Clinical Psychology programme at S-VYASA (Deemed-to-be University), with clinical training from Cadabam's Hospitals, offers a comprehensive learning experience. It focuses on practical skills, research excellence and ethical practice to prepare students for successful careers in clinical psychology and contributions to mental healthcare.

## Clinical Training at Renowned Facility

Students gain hands-on experience at Cadabam's Hospitals, a leading mental healthcare centre in Bangalore known for its comprehensive counselling services.

## Expert Faculty Guidance

Experienced faculty who are both scholars and practitioners, provide personalised mentorship and diverse clinical insights.

## Integrated Learning

The curriculum combines theoretical knowledge with practical clinical experience, preparing students for professional practice in diverse mental health settings.

## Research Opportunities

Students engage in research projects and scholarly activities, contributing to the advancement of clinical psychology knowledge under faculty mentorship.

## Holistic Approach to Mental Health

The programme emphasises evidence-based practices and culturally sensitive approaches, addressing the complex interplay of biological, psychological, social and cultural factors in mental health.

# PROGRAMME OUTCOMES

## Clinical Competence

Graduates demonstrate advanced skills in psychological assessment, diagnosis and intervention for various mental health conditions, including administering and interpreting psychological tests and formulating evidence-based treatment plans.

## Ethical Practice

Graduates adhere to ethical guidelines, ensuring client welfare, confidentiality and professional integrity in their clinical practice.

## Cultural Competence

Graduates are equipped to work effectively with diverse cultural backgrounds, demonstrating respect and adapting interventions to meet the unique needs of individuals and communities.

## Research Proficiency

Graduates conduct empirical research, critically evaluate scientific literature and apply research findings to inform clinical practice and advance the field of clinical psychology.

## Professional Development

Graduates engage in lifelong learning and professional development, staying current with emerging trends and best practices in clinical psychology through continuing education, supervision and professional organisation participation.

# CAREER OPPORTUNITIES AND PLACEMENTS

Clinical Psychologist	Clinical Researcher	Clinical Supervisor	Counsellor or Therapist
Consultant or programme Coordinator	Academic or Clinical Educator	Mental Health Advocate	Private Practice Owner
Forensic Psychologist	Community Mental Health Worker	Rehabilitation Specialist	Crisis Intervention Specialist
Psychotherapy Specialist	Assessment Specialist	Neuropsychologist	Addiction Counselor

# MSc COUNSELLING PSYCHOLOGY

The MSc Counselling Psychology programme at S-VYASA (Deemed-to-be University) is a two year program that combines academic depth with real-world clinical experience to shape competent and compassionate mental health professionals.

Students explore a wide range of topics—from counselling theories, personality and assessment, to advanced approaches like CBT and family therapy. The programme focuses on building strong foundational skills in listening, empathy, and ethical decision-making.

In collaboration with Cadabam's Hospitals, students receive supervised training, working with diverse clients and real cases under expert guidance. This hands-on exposure bridges theory and practice, preparing students for professional success.

Students also participate in research, role-plays, and practicum reviews, preparing them for diverse roles in the mental health field.

## ELIGIBILITY

BA/ B.Sc from a recognised university with a minimum aggregate marks of **50%** (45% in case of SC/ ST/ OBC)

Candidates must have studied Psychology as a compulsory subject or any Allied Health Sciences, Nursing, Physiotherapy, Pharmacy, Life Science, and medical degree

# PROGRAMME HIGHLIGHTS

The MSc Counselling Psychology programme at S-VYASA (Deemed-to-be University) prepares students for professional success. It focuses on providing practical clinical experience through supervised training, real-world case studies, research, and more.

## State-of-the-Art Facilities

Located on a 100-acre green campus within an IT Tech Park, the university offers advanced labs, a central library, and ICT-enabled classrooms.

## Preparation for Licensure and Career Advancement

The program equips students with clinical competence and professionalism to excel in licensure exams and diverse mental health care settings.

## Interdisciplinary Approach

The curriculum integrates insights from psychology, neuroscience, and psychiatry for a holistic understanding of mental health care.

## Advanced Curriculum

The curriculum explores in-depth theories, methodologies, and applications that foster critical thinking and research skills.

## Practical Training

Students gain hands-on experience through practicums, internships, and research projects.

# PROGRAMME OUTCOMES

## Social Responsibility

Graduates understand their role in society and actively contribute to the betterment of it.

## Critical Thinking and Problem Solving

Graduates develop analytical reasoning and problem-solving skills to address complex real-world problems

## Research Skills

Graduates are equipped with independent research capabilities and employ them to advance scientific knowledge and technological innovation.

## Counselling Techniques

Graduates learn a variety of therapeutic techniques and demonstrate understanding of these advanced concepts.

## Practical Application of Knowledge

Graduates are capable of assessing situations in real-time and personalising treatment approaches for the best recovery path.

# CAREER OPPORTUNITIES AND PLACEMENTS

Counselling Psychologist	School or College Counsellor	Mental Health Consultant
Corporate Wellness	EAP Specialist (Employee Assistance Programme)	Rehabilitation Counsellor
Crisis Counsellor	Research Assistant	Academic Associate
Private Practice	Addiction Counsellor	Mental Health Advocate

# MSc HEALTH PSYCHOLOGY

The M.Sc. in Health Psychology at S-VYASA (Deemed-to-be University) is a two-year postgraduate program that provides an in-depth understanding of how psychological, behavioral, and social factors influence health, illness, and healthcare delivery. Rooted in the biopsychosocial model, the program equips students with the skills to assess health-related behavior, design psychological interventions, and contribute to the promotion of physical and mental well-being across diverse populations.

Over the course of two years, in collaboration with Cadabams Hospitals students will explore a wide range of topics including health behavior change, chronic illness management, stress and coping, pain and illness perception, and health-related decision-making. The curriculum balances theory, research, and applied training, making it ideal for those aiming to work in clinical, community, academic, or policy-making roles.

The program also includes practical components such as supervised internships, fieldwork, and a research dissertation, enabling students to apply psychological principles to real-world health settings.

## ELIGIBILITY

**BA/ B.Sc from a recognised university with a minimum aggregate marks of **50%** (45% in case of SC/ ST/ OBC)**

**Candidates must have studied Psychology as a compulsory subject or any Allied Health Sciences, Nursing, Physiotherapy, Pharmacy, Life Science, and medical degree**

# PROGRAMME HIGHLIGHTS

The MSc Health Psychology programme at S-VYASA (Deemed-to-be University) provides a comprehensive understanding of the physiological, social, and behavioural factors that influence health and recovery. The curriculum balances theory, research, and applied training, enabling students to contribute to the well-being of diverse populations.

## Research Opportunities

Students participate in research projects under the supervision of expert faculty, contributing to advancements in health psychology.

## Practical Training

The curriculum incorporates practical components such as internships and fieldwork, enabling students to apply theoretical knowledge in practical settings.

## Professional Development

Students develop the essential professional skills, ethical awareness, and cultural sensitivity required to be a competent practising psychologist.

## Diverse Career Paths

In-depth exploration of psychological theories prepares students for a wide range of career opportunities.

## Expert Mentors

Experienced faculty and practitioners provide personalised mentorship and current industry insights.

# | PROGRAMME OUTCOMES

## Communication Proficiency

Graduates are equipped to precisely communicate psychological concepts and recovery plans with clients, families, caregivers, and interdisciplinary teams.

## Collaborative Approach

Graduates will demonstrate the ability to work collaboratively with other professionals to provide the care and assistance required for patient recovery.

## Behavioural Medicine

Graduates will have a comprehensive understanding of psychological factors associated with health behaviour and contribute to the prevention of lifestyle diseases.

## Data Analysis and Interpretation

Graduates are equipped to gather, interpret, test and report the data using statistics and data analysis techniques to refine recovery strategies.

## Independent and Continuous Learning

Graduates are enabled to learn continuously and independently to adapt with evolving societal needs.

# CAREER OPPORTUNITIES AND PLACEMENTS

Health Psychologist	Behavioural Health Specialist	Rehabilitation Support	Health Promotion Officer
Community Health Worker	NGO Program Specialist	Research Assistant	Health Behaviour Analyst
Wellness Consultant	Employee Health Trainer	Stress Management Specialist	Lifestyle Coach
Chronic Illness Counsellor	Academic Advisor	Mental Health Advocate	Social Worker

# MSc NEUROPSYCHOLOGY

The Master of Science in Neuropsychology at S-VYASA (Deemed-to-be University) is an innovative, interdisciplinary postgraduate program that bridges the domains of neuroscience, psychology, and clinical practice. It is designed for students aiming to build careers in brain-behaviour research, neurocognitive diagnostics, and clinical intervention across neurological and psychiatric conditions.

Neuropsychology, as a field, seeks to understand the relationships between the brain and behavior—how injury, disease, or dysfunction affects cognition, emotion, and daily functioning. This program fosters a deep understanding of brain-behavior relationships and how to assess, diagnose, and manage cognitive and behavioral disorders arising from neurological, psychiatric, or developmental conditions.

With clinical training embedded in real-world psychiatric and neurological settings through our partnership with Cadabam's Hospitals, students are mentored by leading clinicians, researchers, and expert faculty. This ensures that every graduate is not only well-versed in theory but also deeply grounded in hands-on clinical neuropsychological practice

## ELIGIBILITY

**BA/ B.Sc from a recognised university with a minimum aggregate marks of **50%** (45% in case of SC/ ST/ OBC)**

**Candidates must have studied Psychology as a compulsory subject or any Allied Health Sciences, Nursing, Physiotherapy, Pharmacy, Life Science, and medical degree**

# PROGRAMME HIGHLIGHTS

The Clinical Psychology programme at S-VYASA (Deemed-to-be University) in association with Cadabam's Hospitals, prepares students for a fulfilling and impactful career in the field of mental healthcare.

## Integrated Clinical Training at Cadabam's Hospitals

Gain hands-on experience in neuropsychological assessment, diagnosis, and intervention under expert supervision at one of India's leading mental health institutions.

## Comprehensive Curriculum Bridging Brain and Behavior

Learn from a neuroscience-driven syllabus covering neuroanatomy, cognition, psychopathology, assessment tools, and cutting-edge therapeutic techniques including rTMS, neurofeedback, and cognitive rehabilitation

## Research-Driven Learning with Dissertation Focus

Engage in original research guided by experienced mentors, with opportunities to publish and present at national and international forums

## Multidisciplinary Approach

Explore mental health from biological, psychological, social, and cultural lenses—integrated with S-VYASA's unique yogic and holistic framework

## Expert Faculty from Academia and Clinical Practice

Be mentored by a distinguished team of neuropsychologists, psychiatrists, and neuroscience researchers, ensuring both academic depth and clinical precision.

# PROGRAMME OUTCOMES

## Technology Integration

Graduates are enabled to utilise technology and assessment tools commonly used in the field of neuropsychology and stay updated with new developments.

## Diagnostic and Assessment Skills

Students demonstrate expertise in conducting thorough assessments, which include administering and interpreting tests that evaluate cognitive abilities, well-being and overall behavioural patterns.

## Administration Competency

Graduates will have a comprehensive understanding of psychological factors associated with health behaviour and contribute to the prevention of lifestyle diseases.

## Occupational Ethics

Students develop the essential professional skills, ethical awareness, and cultural sensitivity required to be a competent practising psychologist.

## Mental Health Advocate

Graduates are enabled to learn continuously and independently to adapt with evolving societal needs.

# CAREER OPPORTUNITIES AND PLACEMENTS
